WWiSE COMPANY OVERVIEW

ISO DONE RIGHT

World Wide Industrial & Systems Engineers (WWiSE) core business is ensuring companies around the world follow the ISO Standards and principles.

WWiSE specialises in ISO systems Implementation, Consulting, Training & Auditing and has been in business for 16 years and counting.

Our Achievements

 Number of Clients	 Number of Clients Certified to ISO Standards	 Number of Clients who have failed an Audit	 Number of Delegates Trained	 Number of Accreditations, Certifications and Memberships
790 +	620 +	0	560 000 +	20 +

ABOUT ISO

ISO was founded with the idea of answering a fundamental question:

“What is the best way of doing this?”

What is ISO?

ISO is an independent international organisation with a membership of 167+ national Standards bodies that consist of experts sharing knowledge to develop international standards that support innovation and solutions to global challenges.

There are currently 23 452 ISO Standards, and each standard can be considered as a formula for describing the best way of manufacturing products, managing processes, delivering services or supplying materials.

Benefits of being ISO certified?

Improved Business | Improved Regulation
Improved Products & Services

- Reducing Costs
- Increasing Efficiency
- Mitigating Risks
- Creating Consistency
- Improving Customer Confidence
- Increasing Uniformity
- Increasing Competitiveness

POPULAR ISO STANDARDS IN A NUTSHELL

 Quality Management Demonstrate the ability to consistently provide products and services focusing on achieving high customer satisfaction and efficiency. ISO 9001	 Environmental Management Improve your organisation's environmental impact by reducing industrial waste and environmental damage. ISO 14001	 Occupational Health & Safety Enable your organisation to provide safe and healthy workplaces by preventing work-related injury and ill health, and by proactively improving its OHS performance. ISO 45001	 Information Security Management Protect the confidentiality, integrity and availability of your organisation's information and to reduce the probability of being a victim of cybercrime. ISO/IEC 27001
 Business Continuity Management Safeguard your organisation from a wide range of potential threats and disruptions ensuring the continuation of operations without major impacts or losses. ISO 22301	 Energy Management Enable your organisation to follow a systematic approach in achieving continual improvement of energy performance, including energy efficiency, energy use, and consumption. ISO 50001	 Risk Management Enable your organisation to thrive in an environment of constant uncertainty by applying principles and guidelines for effective risk management. ISO 31000	 Food Safety Management Inspire confidence in your organisation's food products by demonstrating the ability to control food safety hazards therefore ensuring the production of safe food. ISO FSSC 22000

Our Process

Gap Analysis Cost

	Gap Assessment	Reporting Days	Cost (exl. Vat & Travel)	Number of Days
1 Standard 1 site	R 10 000-00 per man day	R 10 000-00 (1 day)	R 20 000-00	Completed in 1 day (1 resource)
2 Standards 1 site	R 10 000-00 per man day	R 10 000-00 (1 day)	R 30 000-00	Completed in 1 day (2 resources)
3 Standards 1 site	R 10 000-00 per man day	R 20 000-00 (2 days)	R 80 000-00	Completed in 2 days (3 resources)

Please Note: Inclusive of Travel costs in Gauteng and the Greater Western Cape Region, estimation of R5000,00 per man day for National Travel and R10 000,00 per man day for International Travel

Estimated cost on Implementation

Gap Analysis

R10000-00 per man-day

Implementation cost are dependent on the gap assessment

	Applicable to Common Standards			
	Implementation ISO 9001	Implementation ISO 45001	Implementation ISO 14001	Implementation of any other ISO standard
0-10 Employees (3 Processes)	R 150 000-00	R 100 000-00	R 100 000-00	R 200 000-00
11-30 Employees (6 Processes)	R 180 000-00	R 100 000-00	R 100 000-00	R 350 000-00
31-50 Employees (9 Processes)	R 250 000-00	R 200 000-00	R 200 000-00	R 475 000-00
50-100 Employees (12 Processes)	R 650 000-00	R 550 000-00	R 550 000-00	R 650 000-00
100+ Employees (12 Processes)	R 850 000-00	R 700 000-00	R 700 000-00	R 900 000-00

Please Note: The amounts above do not include VAT.

Estimated costs for Certification

Employees	Total for Certification Cycle (3-Years)
0-10 Employees (3 Processes)	R 250 000-00 (Excluding VAT & Travel)
11-30 Employees (6 Processes)	R 380 000-00 (Excluding VAT & Travel)
31-50 Employees (9 Processes)	R 490 000-00 (Excluding VAT & Travel)
50-100 Employees (12 Processes)	R 650 000-00 (Excluding VAT & Travel)

If an additional standard is added, the cost will increase by 30%

Maintenance

Our maintenance packages for the above services range from the following:

	30 employees or less (1 Management System)	60 employees or less (1 Management System)	100 employees or less (1 Management System)	500 employees or less (1 Management System)
1 day	R 5 500-00 per auditor/consultant per month	R 8 500-00 per auditor/consultant per month on-site, and 1 auditor off-site	R9 250-00 for 2 auditors / consultant per month	R 12 000-00 for 2 auditors / consultant per month
2 days	R 10 000-00 per auditor/consultant per month	R 16 000-00 per auditor/consultant per month on-site, and 1 auditor off-site	R 18 500-00 for 2 auditors / consultant per month	R 20 000-00 for 2 auditors / consultant per month
3 days	R 15 000-00 per auditor/consultant per month	R 24 000-00 per auditor/consultant per month on-site, and 1 auditor off-site	R 27 000-00 for 2 auditors / consultant per month	R 35 000-00 for 2 auditors / consultant per month
4 days	R 20 000-00 per auditor/consultant per month	R 30 000-00 per auditor/consultant per month on-site, and 1 auditor off-site	R 36 000-00 for 2 auditors / consultant per month	R 40 000-00 for 2 auditors / consultant per month

Please note: An additional management system will be charged at 50% of the standard man-day rate.

THREE YEAR SURVEILLANCE

12 Steps of Maintenance

- Step 1:** Reviewing, editing, and maintaining mandatory documentations aligned to the specific ISO standard.
- Step 2:** Reviewing, editing, and maintaining the current process documentation.
- Step 3:** Reviewing, editing, and maintaining the Risk Assessment to the specific ISO standard.
- Step 4:** Awareness training for employees.
- Step 5:** Internal audit on the specific ISO standard as per the Internal Audit Schedule (with on-the-job training where required).
- Step 6:** Assisting with issuing and closing of non-conformances raised during internal audits and correcting the corrective actions, updating the risks assessment accordingly.
- Step 7:** Assisting with strategic objectives analysis and statistical reviews.
- Step 8:** Operationalising ISO standard with ISO Champions and Governance meetings, managing weekly / monthly issue registers.
- Step 9:** Non-conformances, corrective and preventive action reports, management review, maintain meeting actions, and legal compliance aligned to specific ISO standard.
- Step 10:** Reviewing departmental process inputs and verifying their outputs related to specific ISO standard's clauses, objectives, risks, and key performance indicators.
- Step 11:** Assisting during external audits and closing off findings from external audits.
- Step 12:** Encouraging organisations to streamline processes using Microsoft applications for efficient document and record-keeping.

SOME OF OUR CLIENTS

ISO Management Systems Implementation Project Plan

Task List for ISO Implementation

Task description	Month 1	Month 2	Month 3	Month 4	Month 5	Month 6
PHASE 1: GAP ANALYSIS						
1. GAP analysis audit						
2. Project kick-off meeting and awareness training on ISO standards (requirements)						
3. Implementation training for two ISO champions per department (optional).						
4. Information gathering from core and sub-core processes (current policies, procedures, forms and templates and any other departmental documentation).						
5. Identification of templates and standardisation to be signed and approved by client.						
PHASE 2: SYSTEM DEVELOPMENT						
1. Development of the strategic plan aligned to the context of the organisation.						
2. Mandatory documentation & legal requirements addressed.						
3. Legal Evaluation						
4. Documenting departmental/ divisional documentation (standard operating procedures/ work instructions/ forms & templates).						
5. Quality Control Plan / Environmental Aspects & Impacts / HAZARD Identification and Risk Analysis / IT Operational Controls / Safety Files / Energy Performance Indicators / Critical Control Points - Relevant to the Specific ISO Standard (Risk Assessment phase 2)						
6. Conduct a risk assessment workshop.						
PHASE 3: IMPLEMENTATION						
1. Implementation training (on-the-job training) with all employees.						
2. Internal Auditing and maintenance of system training via e-learning for 2 days Delegates						
3. Analysis of statistical data and update of issue and risk register						
4. Non-conformances and corrective action workshop.						
5. Internal audit conducted.						
6. Assist with management review meeting and follow-up on action items .						
PHASE 4: CERTIFICATION PROCESS						
1. Audit readiness for Stage 1						
2. Assist with Stage 1 audit by certification body and Address areas of concern.						
3. Stage 2 audit by certification body.						
4. Closing of Non-cnformance and Corrective Actions after certification audit.
