

ISO DONE RIGHT

World Wide Industrial & Systems Engineers (WWISE) core business is ensuring companies around the world follow the ISO Standards and principles. WWISE specialises in ISO systems Implementation, Consulting, Training & Auditing and has been in business for 16 years and counting.

Our Achievements

OVERVIEW OF CYBER INSURANCE

Cyber insurance protects organisations from digital security costs. It covers first-party expenses like breach investigation and data recovery. It also handles third-party liabilities and public relations. This provides a financial safety net after a cyber incident.

WWISE ROLE IN CYBER INSURANCE

WWISE equips the insurance industry with an end-to-end platform to master the cyber risk landscape. We empower brokers and insurers by providing instant client risk assessments, accurate premium estimates, and expert guidance on first and third-party coverage, seamlessly integrating these tools into your sales process to close deals faster and with greater confidence.

Our partnership extends beyond the initial sale to ensure long-term client retention and resilience. We deliver continuous value with hands-on incident response, implementation of global security frameworks like NIST and ISO 27001, and targeted training programs. This not only strengthens your clients' security posture but also secures smoother renewals, transforming your cyber insurance offering into a proven growth engine.

BENEFITS OF CYBERSCEURITY

- Centralised security visibility across hybrid environments.
- Faster detection and response to advanced threats.
- Support for compliance and audit requirements.
- Reduction in alert fatigue through correlation and prioritisation.
- Scalable architecture for enterprise and cloud-native deployments

WHY CHOOSE US

- **Expertise:** Certified professionals with years of experience in cybersecurity and compliance.
- **Tailored Solutions:** Customised network security strategies aligned to your business needs.
- **Proactive Defence:** We do not just detect threats, we prevent them.
- **Trusted Partner:** Supporting organisations across industries with proven results.

Services for Cyber Insurance Companies

Category	Service
Pre-Underwriting	Cyber risk assessments for accurate risk profiling before issuing cyber policies
Risk Scoring	Cyber risk scoring to assist with premium calculations and underwriting decisions
Executive Reporting	Board-level cyber risk reports for visibility and compliance
Third-Party Risk	Vendor risk assessments to manage supply chain exposure
Post-Incident Support	Forensics and ransomware readiness to support claims investigations

Services for Cyber Insurance Clients

Category	Service
1. Risk & Compliance	• Cybersecurity audits (ISO/IEC 27001:2022, NIST, COBIT) • POPIA, GDPR, HIPAA compliance reviews • Cybersecurity policy development
2. Technical Security	• Vulnerability and penetration testing • Cloud and IoT security reviews • Ransomware readiness assessments
3. Awareness & Behaviour	• Security awareness training • Phishing simulations • Behavioural analysis
4. Monitoring & Intelligence	• SIEM monitoring • Threat intelligence and dark web monitoring
5. Incident Response & Recovery	• Incident response planning • Business Impact Analysis (BIA) • Disaster recovery and business continuity

WHAT WWISE OFFERS

- 1. Risk Assessments for Underwriting**
WWISE's cyber risk assessments help insurers set more accurate premiums and provide clients with an initial, non-binding quote during underwriting.
- 2. Standards-Based Alignment**
The assessments are aligned with international frameworks such as ISO/IEC 27001, COBIT, and NIST
- 3. Cyber Awareness Training**
We provide interactive training through our Learning Management System (LMS) to help clients understand Cyber risks and the importance of cyber insurance for both new and existing clients.
- 4. 24/7 Security Operations Centre (SOC)**
WWISE provides 24/7 threat monitoring via its Security Operations Centre and offers complete ransomware response, supported by its own legal and technical experts.
- 5. Incident Response & Business Continuity**
If a client experiences a breach, we offer incident response within 24 hours, including data recovery and business continuity support to reduce downtime and impact.
